

## Focal Astral 16

NOT ONLY DOES Focal's home cinema processor (Dolby Atmos, DTS:X, Auro-3D) handle up to 16 channels, it backs up this feature trick with 12 channels of onboard amplification. The result is a fantastically flexible system hub, with 20Hz-20kHz Dirac Live room

calibration – plus full manual configuration – provided to fine-tune performance. System builders will appreciate its accommodating nature; end users will revel in its cohesive, nuanced soundstaging and the energy and drive brought by its power reserves. This is high-end hardware fit for the finest of setups.

### PRODUCT DETAILS

**PRICE** £20,000

**TYPE** 16-channel processor/  
12-channel amplifier

**WEIGHT** 20kg

**DIMENSIONS** (WxHxD)  
479 x 490 x 191mm
