

Focal Chora 826-D

FOCAL CHOSE ITS Chora series for its first Dolby Atmos-enabled floorstander – building an angled 5in coaxial driver into the top of its three-way 826 tower – and it sounds sublime. The front-firing slatefiber cone woofers and custom ‘TNF’ tweeter create a full-range soundstage with an impressively wide reach, and one that’s able to segue from light and delicate to bursting with energy in an instant. Atop this comes a height layer of impactful overhead effects. Focal’s elegant cabinets are available in light wood, dark wood (pictured) or black finishes, and the Chora lineup includes centre and on-wall surround models, allowing assembly of a tonally, aesthetically matched system.
