

# ELEAR EAR PADS

## Product Data Sheet

The ear cushions are covered with a microfibre fabric. These ear pads enhance your Elear headphones listening comfort. The material offers excellent acoustic behaviour over the entire audio spectrum. What's more, the perforations on the inside of the ear cushion provide a linear register in the 1 - 10kHz frequency range. Finally, the high-resilience memory foam ear cushions provide maximum comfort.

Available as an accessory, they are compatible with the Focal's Utopia and Elear headphones.

### Key features

- High-resilience memory foam ear cushions for maximum comfort.
- Easy to put on and remove thanks to the 5 attachment points.
- Poron foam®: soundproof joining of the ear cushion to the baffle.
