

Elite power connection KIT

EK21 (21mm² - 4 AWG)

"Ready-for-use" for installing the ELITE power amplifier range, this kit includes only the best in terms of high-end connector technology. Guaranteeing audiophile-quality sound and the elimination of most interference, the cables will help to get the best output from your amplifier. The power supply cables and RCA cables feature High Flexible PVC Soft Touch technology and 100% Oxygen Free Copper (OFC) conductors. Multiple braiding for maximum flexibility of the power supply cable (making the cable easy to feed into the compartment of the vehicle). Connection is ensured by gold-plated metal plugs, "silver anodized" connectors. Optimal connection is obtained partly thanks to the split connectors which ensure a good spring effect on female plugs.

Individual blister packaging.

Insulator: "Flexible PVC Soft Touch".
Light black translucent.

Gold-plated metal plugs,
"silver anodized" connectors.

WHAT MAKES THE DIFFERENCE

- High-flexibility power cable (multiple braiding)
- Optimal connection to eliminate system interference
- Ready-to-use Kit for optimal assembly of quality installations

1862 strands 100% OFC.

TECHNICAL CHARACTERISTICS

Power cable: 5.20m (17ft) x 35mm² (4 AWG)

(1862 strands: 7 x 38 x 7 x 0.12mm) 100% OFC

Ground cable: 0.70m (2.3ft), area 21mm² (4 AWG)

Gold-plated fusebox, fusehold prewired and mounted with 150A+

Remote cable: 5m (16.4ft)

RCA cable (ER5): 5m (16.4ft), 100% OFC

Accessories

USAGE RECOMMENDATIONS

500W power amplifier

(exemples : FPS2160/FPS4160/FPS2300/FPS1500)
