

iTRANSMITTER Specification sheet

Designation: ITRANSMIT HD WIRELESS iTRANSMITTER / Reference: R1109

- Wireless, lossless and no sound interruption transmission
- Sound quality identical to transmission with cables to CD player
- No setting, simply connect the iTransmitter to the player, it instantly plays
- Can be connected to any iPod/iPhone or iPad and go from one to another
- Several iTransmitters (or USB Transmitter or iDock Transmitter) can be synchronised with a Power Bird
- Low consumption, player battery life preserved
- Very simple to install, no handling necessary
- Around 10 metres range

	iTransmitter
Range	around 10m indoor
Frequency response (± 3 dB)	20Hz – 20kHz
Sensitivity	87dBm
Distortion	<0.1% (20Hz - 20kHz)
Signal noise ratio	around 86dB
Sampling frequency	44.1kHz max.
Frequency range	2.403 - 2.478GHz
Data power	2.37Mbps
Dimensions (L x D x H)	1 ^{7/8} x 0 ^{3/4} x 0 ^{1/4} " (47 x 19 x 6.5mm)
Weight	0.021b (7g)

With the iTransmitter connected to an iPod®, iPhone® or iPad®, the "the Freedom of Sound" phrase suddenly makes sense. Thanks to the chosen Kleeer® wireless transmission system, the sound of the Apple® music player reaches the Power Bird amplifier with sound quality strictly identical to CD quality (with files in CD format WAV or AIFF type). Able to transmit any audio files compatible with player (AAC, MP3, Apple Lossless), it can transmit web radios, game or video soundtracks, etc.
