

Focal presents the AP 4.380, a high-performance amplifier designed to enhance in-car music experience

Focal reveals the AP 4.380, an amplifier specifically designed for vehicles. This amplifier follows the successful AP 4.340 model and combines efficiency with performance to provide a complete audio kit. Focal, a French brand known for its sound expertise, is expanding its range of high-performance on-board systems with this latest addition.

FLEXIBLE INSTALLATION OPTIONS

The AP 4.380 amplifier is designed to work with various configurations. It can power different speaker drivers using 4, 3 or 2 channels. The bridgeable feature of this power boost allows two channels to power a single speaker driver, enhancing the sound dynamics and delivering an immersive audio experience. The RCA input is also easy to connect to the car radio system, for easy installation.

BALANCING POWER AND QUALITY

The AP 4.380 is a class A/B amplifier that delivers precise and powerful sound. It is known for its high level of stability and reliability, and its aluminium chassis is designed to facilitate heat dissipation. This amplifier offers great value for its price and is an ideal match for Focal speaker driver kits such as Slatefiber, Polyglass, Access, Universal, or Auditor, as well as other in-car speaker drivers.

FOCAL CAR AUDIO: A COMPLETE SOLUTION

With meticulous design, exclusive patented technologies, carefully selected cones and flexible installation options, Focal engineers have paid careful attention to every detail. They have designed audio systems that deliver precise, powerful and immersive in-car sound. Speaker driver technologies offer a distinctive sound signature, which can be further complemented by on-board audio kits. The Focal range of amplifiers and cabling provide a complete solution; whether you have a simple or a sophisticated system, the AP 4.380 enhances your in-car sound experience.

Product available: March 2024
